

Equipment for Personal Protection

Dedicated Healthcare Solutions

Infection Control

About Uhs

Established in 1978, Uhs has led the way in offering cost-effective solutions to healthcare providers for over 25 years.

Essentially a Sales & Marketing operation, Uhs has a vast portfolio of products that originate from:

- Its own manufacturing facility
- OEM products from UK and overseas manufacturers
- Exclusive partnerships with other major health care manufacturers: Kimberly-Clark, Sterisol UK, PDI, Safeguard, Exel, Antec International & Yamasu

As one of the major suppliers to NHS Logistics, we utilise the services of:

- Southern Syringe Services Ltd, the largest distributor of disposable medical and surgical products to UK hospitals
- 3S Health Care, providing the Uhs product portfolio to all other areas of the healthcare market
- To order all Universal Products, please refer to details on back cover

The Personal Protective Equipment Selection

The use of protective equipment/clothing in preventing cross-infection is extremely important given:

- The morbidity & mortality associated with infections (Department of Health (Doh) 1995)
- The cost of treating infections (National Audit Office 2000, Plowman et al 1999)
- The increasing problem of antibiotic resistant micro-organisms (House of Lords Select Committee on Science & Technology 1998)

Protective Clothing

Protective equipment/clothing is used to protect both patient & healthcare worker from the risk of cross contamination and cross infection.

Protective equipment clothing should be worn for the task intended/episode of care & then removed.

Protective equipment/clothing should be worn appropriately & correctly in order to manage the risk of exposure to micro-organisms, which may be hazardous to health (Control of Substances Hazardous to Health (COSHH) 1999).

(ICNA Protective Clothing – Principles and Guidance 2002)

For further products & code information see page 24

FACE MASKS

In today's healthcare environment, you need protection you can depend on. Current Health & Safety standards require that healthcare workers & patients have access to adequate and reliable facial protection. When selecting a Face Mask the following factors should be considered:

Protection – Putting Safety First

Procedure – What and Where?

Personal Comfort – Encouraging Compliance

Our masks are conveniently divided into 3 main categories:

■ **Standard** ■ **Fluid Resistant** ■ **Speciality**

Kimberly Clark surgical and procedure Face Masks are manufactured to exceed the European Standard EN14683 - Face Masks intended to limit the transmission of infective agents. For further information regarding this standard please contact our customer services department.

STANDARD FACE MASKS

The Standard Face Mask category offers basic traditional protection for staff circulating in the theatre environment, and includes masks in surgical and procedure styles designed for use in general patient care, contact isolation and other general health care environments.

Kimberly-Clark Standard Face Masks with Ties

Designed with extra lightweight materials to improve breathability and provide a cooler, more comfortable mask.

- Filters down to 1 micron
- Tested over 5 hours at 95% filter efficiency
- Protective three-layer construction
- Supplied in a variety of colours
- Glass fibre free
- Latex free
- Masks for sensitive skin also available

1 Uhs Ref: UN47500 ■ Soft Touch II with Horizontal Ties

■ EN14683 - Type II

■ Pack QTY: 6 x 50

2 Uhs Ref: UN48100 ■ Lite One Face Mask ■ Colour: Blue

■ EN14683 - Type II

■ Pack QTY: 6 x 50

For further products & code information see page 24

Standard Face Masks with Earloops

Produced from extra lightweight materials to improve breathability and provide a cooler, more comfortable mask.

- Soft, stretch earloops for convenience in use and comfort in wear
- Filters down to 1 micron
- Tested over 5 hours at 95% filter efficiency
- Protective three-layer construction
- Supplied in a variety of colours
- Glass fibre free
- Latex free
- Masks for sensitive skin also available

FLUID RESISTANT FACE MASKS

The FLUIDSHIELD* Procedure Mask offers the protection of patented LONCET* breathable film, which helps protect healthcare workers against exposure to blood and body fluids. The improved media filters feature a finer filter layer and extended wearability. All Kimberly-Clark* fluid protection Face Masks meet the ASTM Standard for fluid resistance; they are available in a variety of styles.

The orange colour is your assurance of a quality, high performance mask with fluid protection.

Kimberly-Clark Fluidshield Face Masks with Ties

The FLUIDSHIELD* Procedure Mask helps protect healthcare workers against exposure to blood and body fluids. Long, durable ties make this mask convenient to use and comfortable to wear.

- Filters down to 0.1 micron
- Tested over 8 hours at 99.5% filter efficiency
- Resists fluid penetration
- Supplied with or without see-through face visor
- Glass fibre free
- Latex free

SPECIALITY FACE MASKS

Products in the Speciality Face Mask category offer various features addressing both user preferences and clinical need, including added protection in areas of potentially high infection risk, or when a high standard of infection control is needed.

Products within this range are broken down into the following groups:

- Particulate Filter Respirators
- High Filtration Face Masks
- Laser Pleat-Style Face Mask
- Fog Free and Anti-Fog Face Mask

For further products & code information see page 24

Kimberly-Clark Particulate Filter Respirators **EN149 (PFR P1, P2 and P3)**

The Kimberly Clark PFR mask range has been developed to provide the necessary protection for health-care workers against submicron particulate matter. Today's PFR range is the UK market leader, used extensively throughout the NHS and also throughout the world.

Respirators EN149 (FFP1, FFP2 and FFP3)

- Conforms to EN149: 2001
- CE Marked as Personal Protective Equipment
- Complies with Health & Safety Executive requirements for Personal Protective Equipment
- FFP2 exceeds NIOSH requirements for TB
- FFP2 meets British Thoracic Society recommendations
- FFP2 exceeds Dept of Health requirements for MDR, TB & HIV related TB
- FFP3 recommended by WHO, HSE and Dept of Health for SARS and Avian Flu related outbreaks.

1 Uhs Ref: UN62354 ■ PFR P1 (FFP1) Particulate Filter Respirator

■ Pack QTY: 6 x 50

2 Uhs Ref: UN62408 ■ PFR P2 (FFP2) Particulate Filter Respirator

■ Pack QTY: 6 x 50

3 Uhs Ref: UN62360 ■ PFR P3 (Valved FFP3) Particulate Filter Respirator

■ Pack QTY: 12 x 20

Kimberly-Clark Particulate Filter Respirator – N95 (PFR95)

Universal offer a NIOSH (National Institute for Occupational Safety and Health) approved respirator that not only meets the requirements for filtration and facial fit but also provides fluid protection and wearing comfort (NIOSH is a US Government organisation).

- NIOSH approved for Tuberculosis
- Provides greater than 95% filter efficiency
- Filters down to 0.3 micron particles
- Orange colour indicates fluid resistance

1 Uhs Ref: UN46727 ■ PFR 95 Particulate Filter Respirator

■ Pack QTY: 6 x 35

For further products & code information see page 24

High Filtration Face Masks

In today's medical environment, healthcare workers need more from a Face Mask – more coverage, more performance, and more protection. The High Filtration Face Mask range provides optimum protection by meeting the CDC recommendations for fit and filtration.

- Glass fibre free
- Large cool breathing chamber
- Filters 0.1 particles at 95% efficiency
- Comfortable facial fit
- Secure fitting headbands

1 Uhs Ref: UN47717 ■ PCM2000 Particle Free Face Mask Headbands ■ EN14683 - Type II ■ Pack QTY: 6 x 50

Kimberly-Clark Laser Pleat-Style Face Mask

The Laser surgical mask offers improved protection from possible laser plume contaminants during laser procedures. The distinctive silver patterned outer facing easily identifies the Laser as the surgical mask that will help protect the wearer from airborne sub-micron particulate matter.

- Glass fibre free
- Filters 0.1 particles at 98% efficiency
- Extra wide mask provides better fit
- Secure fitting headbands with ties

1 Uhs Ref: UN47625 ■ Laser Mask - With Ties ■ EN14683 - Type II ■ Pack QTY: 6 x 35

For further products & code information see page 24

Kimberly-Clark Fog Free and Anti-Fog Pleat-Style Mask

Kimberly Clark introduce two pleated masks that offer effective ways to gain a better facial seal from a standard surgical Face Mask. This extra feature is a vital requirement in preventing the fogging of eye wear in the theatre environment.

Fog Free – prevents fogging by the addition of a strip of medical grade hypoallergenic adhesive Derma-touch tape along the enclosed flexible nosepiece.

Anti-Fog – incorporates soft, thin layers of film that cover the top of the mask to reduce potential fogging. The inner layer creates a seal with the skin so that the warm exhaled breath cannot escape out the top of the mask.

1 Uhs Ref: UN49215 ■ Fog Free Face Mask with Derma Tape

■ EN14683 - Type II

■ Pack QTY: 6 x 50

2 Uhs Ref: UN49235 ■ Anti Fog Face Mask ■ Colour: Green

■ EN14683 - Type II

■ Pack QTY: 6 x 50

Fit Test Kit

Fit testing is a way of ensuring that a respirator fits each individual wearer. It requires a subject to wear a respirator and another person to administer the test. The Bitrex fit test is a qualitative test, i.e. a pass/fail test that relies on the individual's response to the test agent (such as isoamyl acetate, saccharin or Bitrex).

Bitrex® Fit Test Kit

- Offers everything necessary to conduct a qualitative fit test for disposable and reusable respirators
- Bitrex has a bitter taste that indicates breakthrough in respirator fit.

1 Uhs Ref: UNHM10301 ■ Fit Test Kit For Respirators

■ Pack QTY: 1

For further products & code information see page 24

PROTECTIVE EYE WEAR

Health & Safety standards require that healthcare workers and patients have access to adequate facial protection from blood borne pathogens.

Protective eye and face visors protect the skin and the mucous membranes of the eyes, nose, and mouth from exposure to blood or other potentially infectious material. Using protective eye wear can reduce risk of exposures to dangerous blood borne pathogens.

 **Kimberly-Clark**

Guardall Shields

The Kimberly Clark Guardall Shield offers a safe, effective method of facial protection from potentially dangerous blood and body fluids. The lightweight, optical-grade shield ensures complete, undistorted visibility while protecting the wearer.

1 Uhs Ref: UN41205 ■ ¾ Length Guardall Shield - 19cm

■ Pack QTY: 40

Astrospec® Spectacles/Goggles

The Astrospec features adjustable temple length, integral side shields and brow guard, polycarbonate, anti-fog, anti-static, anti-scratch coated lens. An economical alternative to prescription safety eye wear.

1 Uhs Ref: UN9168666 ■ Astrospec Spectacles/Goggles

■ Pack QTY: 5

For further products & code information see page 24

The Safeview® Range

Universal offers SAFEVIEW® protective eye wear for use in situations which may involve splashing or spraying of potentially infectious fluids. Both loose frames and replacement lenses are available.

- Loose frames in a range of attractive colours
- Convenient to combine with replacement lenses
- Frames supplied in packs of 10
- Replacement lenses supplied in packs of 250
- Latex free

Possible Product Combinations

Total Fluid protection

- Safeview & Fluid Shield mask
With ties - UN48207
- Safeview & Fluid Shield mask with

information see page 24

MOLDEX RESPIRATORS

This range of respirators have been designed specifically for the personal protection of workers in healthcare and industry. These well designed and engineered products provide comfort and style for wearers and cost savings for employers. The range consists of 2 main products groups.

5000 Series

- Supplied pre-assembled and easy to use.
- These effective, disposable respirators combine high performance with minimum maintenance and no requirements for record keeping.
- The 5000 series masks are lightweight and easy to fit.
- Gas filter cartridges provide gas and vapour protection.
- Replaceable particulate filter discs provide dust, mist and fume protection where required.
- The Moldex 5000 Series meet the requirements of EN405:2001, EN143:2000 and *EN143:1990.

2

1 Uhs Ref: UNHM810201 ■ Mask Body Medium with Organic Vapour Cartridge

■ Pack QTY: 1

2 Uhs Ref: UNHM817201 ■ Mask Body Medium with P2 Particulate filter & A1 Organic Vapour Cartridge

■ Pack QTY: 1

8000 Series

- Cost effective, reusable respirators providing high performance and low maintenance protection.
- Gas filter cartridges provide gas and vapour protection.
- Replaceable particulate filter discs provide dust, mist and fume protection where required.
- The 8000 Series can be used for gas/vapour protection, gas/vapour plus particulate protection, or just particulate protection dependant upon which combination of adaptors and cartridges are used.
- The Moldex 8000 Series meet the requirements of EN140, EN141, *EN143:1990 and EN143:2000.

■ Pack QTY: 1

For further products & code information see page 24

Replacement Gas/Vapour Cartridges

Every cartridge comes with a built-in inhalation valve. No Baskets, no yoke. Less Parts, less maintenance, less inventory, means cost savings. Moldex cartridges feature a snap-in mount that eliminates chances of misthreading and misaligning. All Filters are NIOSH approved for organic vapours.

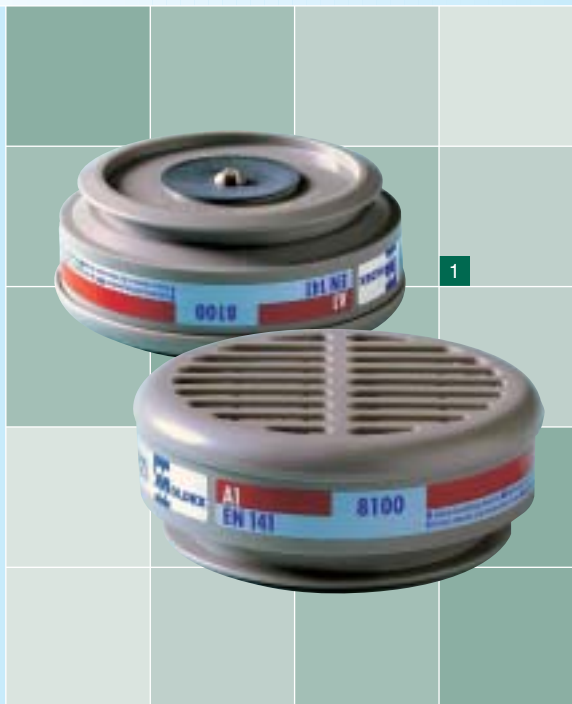

Examples of filter use:

A1 Cartridges - Working with solvents created by mixing paints and adhesives

A2 Cartridges - As A1 but to higher concentrations or for prolonged use

ABE 1 Cartridges - As A1 but with additional protection against e.g. H₂S, SO₂, hydrochloric acid

ABEK 1 Cartridges - As ABE1 but with additional protection against ammonia

1 Uhs Ref: UNHM810001 ■ Replacement Filter A1

■ Pack QTY: 5 Pairs

Replacement Particulate Filters

The moldex range of disposable filter disks make the 8000 series respirator even more comfortable and economical. Different levels of filtration protection can simply be "snapped" into place.

You simply choose the level of protection required - FFP1, FFP2 or FFP3.

The disks also have the advantage of being lighter than traditional filter cartridges.

1 Uhs Ref: UNHM806001 ■ Particulate Filter P1 (FFP1)

■ Pack QTY: 1 x 6prs

2 Uhs Ref: UNHM807001 ■ Particulate Filter P2 (FFP2)

■ Pack QTY: 1 x 4prs

For further products & code information see page 24

APRONS

As part of the Uhs extensive infection control product selection, our apron range plays an important role in the implementation of Standard Precautions within the health care environment.

The aprons are available in rolls or flat-packed in easy-to-dispense packaging.

The needs of individual clinical areas are met by offering a variety of:

- Sizes
- Gauges
- Colours
- Pack types

Disposable Aprons on a roll 20 micron / 80 gauge

A light disposable apron for everyday protection.

- 2 lengths available 107cm and 117cm
- Variety of colours
- 200 aprons per roll

1 Uhs Ref: UN972G/200 ■ Polythene Aprons on a Roll ■ Colours: 5 available (See page 28) ■ Pack QTY: 5 x 200

Disposable Heavy Duty Aprons on a Roll 50 micron / 200 gauge

A longer heavy duty apron for when extra protection is required.

- Available in green
- 147cm in length
- 50 aprons per roll

1 Uhs Ref: UN972L/50 ■ Polythene Aprons on a Roll ■ Pack QTY: 50

For further products & code
information see page 24

Apron Dispenser – Aprons on a Roll

Wall mountable dispenser for aprons on a roll. Allows aprons to be easily and conveniently dispensed.

- Manufactured from durable white plastic which is easy to clean and disinfect when required.
- Dispenser is supplied with fittings so that it may be wall mounted.

1 Uhs Ref: UN974D ■ Universal Apron Dispenser - Plastic

■ Pack QTY: 1

2 Uhs Ref: UN972L/D ■ Dispenser for Heavy Duty Aprons on a Roll

■ Pack QTY: 1

Disposable Aprons – Flat Packed 20 micron / 80 gauge

A light disposable apron for everyday protection in its own dispensing pack.

- Variety of colours
- Lengths available 107cm and 117cm
- 100 aprons per pack
- Packaged in own dispensing pack

1 Uhs Ref: UN974G ■ Polythene Aprons ■ Colours: 5 available (See page 28)

■ Pack QTY: 10 x 100

Mediguard Theatre & Mortuary Aprons – 50 micron / 200 gauge

The Heavy duty aprons are individually folded & wrapped. Designed to dispense aprons one at a time from outer box packaging.

- Wall mounted bracket available
- 150cm length
- Individually wrapped
- 25 aprons per box

1 Uhs Ref: UN440050 ■ Mediguard - Folded Polythene Aprons

■ Pack QTY: 8 x 25

For further products & code information see page 24

HEAD WEAR RANGE

Caps and Hoods

The Universal Head Wear range has been designed in a variety of styles to offer individual choice.

This range of Head Wear styles and colours is perfect for your surgical team and patients.

The primary function of Head Wear is to provide complete containment of the hair, preventing the migration of skin scales and hair particles to the patient. Each product is manufactured from soft, durable, non-woven, Chicopee material designed with generous sizing to enable a variety of hair styles to be restrained comfortably.

This lightweight fabric prevents the passage of particles whilst allowing the scalp to breathe.

GLOVES

Universal's extensive range of medical examination gloves includes proprietary latex & nitrile formulations & an economical vinyl range – the right glove for every clinical task.

Universal gloves help safeguard healthcare employees from exposure to blood borne pathogens and other infectious materials, whatever the task or procedure. All gloves are tested to the required standard where appropriate.

LATEX FREE EXAMINATION GLOVES

Latex allergies are often a consideration in the decision to switch to latex-free medical examination gloves. While latex-free medical gloves may be more expensive than their natural latex counterparts, the direct and indirect costs of managing latex allergies need to be factored into the overall picture.

Universal offer a number of latex free options to suit all healthcare individuals.

- Blue Nitrile – sterile & non sterile
- Purple Nitrile
- Syntec Synthetic glove 24cm or 30cm cuff length
- Clear Vinyl

Syntec Powder Free 24cm Length

A synthetic powder free examination glove that really feels like latex now provides the alternative solution for individuals with allergies to natural rubber latex. Syntec does not contain natural rubber protein - contains no natural rubber thus eliminating the risk of latex allergies.

A unique combination of allergy prevention and comfort.

- Excellent gripping under wet or dry conditions
- Beaded cuff for easy donning
- Sizes: XS-XL
- Ambidextrous and easy to put on
- 100 gloves/box

1 Uhs Ref: UNH97003 ■ NPF - Blue Nitrile Powder Free

■ Pack QTY: 10 x 100

For further products & code information see page 24

Syntec Powder Free 30cm Length

A synthetic powder free examination glove that really feels like latex now provides the alternative solution for individuals with allergies to natural rubber latex.

Syntec does not contain natural rubber protein – contains no natural rubber thus eliminating the risk of latex allergies.

A unique combination of allergy prevention and comfort.

- Excellent gripping under wet or dry conditions
- Sizes: XS-XL
- 100 gloves/box
- Beaded cuff for easy donning
- Ambidextrous and easy to put on
- Long cuff for extra protection

1 Uhs Ref: UNH97200 ■ NPF - Blue Nitrile Clean

■ Pack QTY: 1 x 50 prs

Purple Nitrile Powder Free

Designed for use in examination procedures for healthcare professionals and patients who are allergic to latex, or want to protect themselves from latex exposure and avoid latex sensitisation. Nitrile gloves also provide an effective barrier protection against a broad range of chemicals.

100% nitrile formulated. Powder-free to prevent drying effect of glove powder and powder-induced irritations.

- Excellent gripping under wet or dry conditions
- Sizes: XS-XL
- 100 gloves/box
- Beaded cuff for easy donning
- Ambidextrous and easy to put on

1 Uhs Ref: UNH97007 ■ NPF - Purple Nitrile Powder Free

■ Pack QTY: 10 x 100

For further products & code information see page 24

Blue Nitrile Powder Free

Designed for use in examination procedures for healthcare professionals and patients who are allergic to latex, or want to protect themselves from latex exposure and avoid latex sensitisation. Nitrile gloves also provide an effective barrier protection against a broad range of chemicals.

100% nitrile formulated. Powder-free to prevent drying effect of glove powder and powder-induced irritations.

- Excellent gripping under wet or dry conditions
- Sizes: S-XL
- 100 gloves/box
- Beaded cuff for easy donning
- Ambidextrous and easy to put on, wet or dry

1

1 Uhs Ref: UNH99010 ■ SYNTEX - Synthetic Powder Free Reg Length 24cm

■ Pack QTY: 10 x 100

Blue Nitrile Powder Free Sterile

Ideal alternative to latex for sterile applications designed for healthcare professionals and patients who are allergic to latex, or want to protect themselves from latex exposure and avoid latex sensitisation.

100% nitrile formulated. Powder-free to prevent drying effect of glove powder and powder-induced irritations.

- Excellent gripping under wet or dry conditions
- Sizes: S-XL
- 50 pairs of gloves individually packaged in a dispensing box
- Beaded cuff for easy donning
- Ambidextrous and easy to put on
- Sterile

1

1 Uhs Ref: UNH98070 ■ SYNTEX - Synthetic Powder Free XL Length 30cm

■ Pack QTY: 10 x 100

For further products & code information see page 24

Clear Vinyl Powder Free

A cost-effective alternative to latex for low-risk situations. Safehand clear Vinyl examination gloves offer a safe, effective and comfortable alternative to natural rubber latex.

- Vinyl glove (polyvinyl chloride)
- External surface provides good grip
- Sizes: XS-XL
- 100 gloves/box
- Beaded cuff for easy donning
- Ambidextrous and easy to put on

1 Uhs Ref: UNH93001 ■ VPF - Clear Vinyl Powder Free

■ Pack QTY: 10 x 100

LATEX EXAMINATION GLOVES

The Safehand latex examination gloves provide a secure grip as well as a high level of comfort and safety.

Safehand latex examination gloves also provide a secure barrier against viruses and micro-organisms. All gloves meet the required national standards.

Latex Powder Free

Safehand Latex is the ideal solution for healthcare professionals who want to establish or maintain a powder-free environment. Due to a specific latex formulation Safehand Latex offers excellent elasticity, flexibility and fit. Wide range of uses and all daily examination procedures.

- Excellent gripping under wet or dry conditions
- Sizes: XS-XL
- 100 gloves/box
- Beaded cuff for easy donning
- Ambidextrous and easy to put on

1 Uhs Ref: UNH90402 ■ LPF - Latex Powder Free

■ Pack QTY: 10 x 100

Glove Dispensers

Keep gloves readily available in this wall mountable dispenser.

- Wall Mountable
- Clean white colour wipeable
- Adjustable bracket accommodates different sized boxes
- High impact polystyrene
- Economical

1 Uhs Ref: UNH13GDM ■ UHS Dracula Exam Glove Dispenser

■ Pack QTY: 1

For further products & code information see page 24

FITTING OF PARTICULATE FILTER RESPIRATORS

To ensure your Particulate Filter Respirator provides the intended level of protection, it is important that the respirator is applied properly, and that a "Fit Check" is performed **EACH AND EVERY TIME** you wear it.

NOTE: When using a Particulate Filter Respirator, the coloured side **MUST** be worn facing outward and upward in order to provide the best fit possible.

Directions for Proper Donning:

Properly donning your Particulate Filter Respirator may feel a little awkward at first, but it will become easier with repeated applications. Please use the instructions to the right when applying this respirator.

Achieving a good fit:

If you have a problem successfully Fit Checking your respirator, try the following:

1. Use a mirror while adjusting the respirator.
2. Ask someone to look for hair or earrings that might be caught in the seal.
3. Make sure the headbands are positioned properly. It is especially important that the top headband is on the crown of your head, as it is designed to hold the bottom of the respirator snug against your chin.

Refer to your local hospital policies for further information.

FITTING OF PARTICULATE FILTER RESPIRATORS

It is important to fit check the respirator every time you wear it

Forcefully inhale and exhale several times. The respirator should collapse slightly when you inhale and expand when you exhale. You should not feel any air leaking between your face and the respirator. If the respirator does not collapse and expand OR if air is leaking out between your face and the respirator, then you have NOT achieved a good facial fit. Adjust the respirator until the leakage is corrected and you are able to successfully Fit Check your respirator.

1 Separate mask to open fully

2 Gently pre-bend nosepiece to conform mask to face

3 Hold mask upside down to expose the two headbands

4 Separate the headbands with index fingers

5 Cup the mask under chin (orange side out)

6 Bring the headbands over the head

7 Place the first headband at neck, Pull the remaining headband up and place at crown

8 Form nosepiece tightly across bridge of nose and face. Adjust mask to achieve facial seal

Do not proceed with your activities until you have checked your respirator successfully.

The above fitting instructions apply to all respirators within the Kimberly Clark range.

PFR 95

PFR P1

PFR P2

PFR P3

Attention

If after trying these tips you are still unable to successfully Fit Check your respirator, please contact one of our product specialists using the contact information provided.

The above sequences are only a guide. Refer to your local hospital policies for further information.

All Products & Code Information

Uhs supply a vast range of personal protective equipment which is available in an array of sizes, quantities and colour references. It would be impossible to display all of these products in the catalogue; the product pages show part of the range.

The following pages detail the entire Uhs Personal Protective Equipment range, together with code information, a small description and sizes, types and quantities available. If you wish to order products, note down the relevant codes and use the contact details on the back page, If you need further advice please contact your Uhs sales representative who will be pleased to help.
